Book Reviews	323–324	*Hydrology of Ice Caps in Volcanic Regions:* Helgi Bjornsson. *The Frozen Earth:* Peter J. Williams and Michael W. Smith
G. van Gelder, L. W. S. de Graaf, and E. Schurink	329–340	Subglacial Consolidation of Fine-grained Stratified Sediments: A Neglected Tool in Reconstructing Ice-thickness in Pleistocene Valley Glaciers
Kevin Kiernan	341–354	The Extent of Late Cenozoic Glaciations in the Central Highlands of Tasmania, Australia
D. T. Rodbell	355–365	Soil-age Relationships on Late Quaternary Moraines, Arrowsmith Range, Southern Alps, New Zealand
Margaret E. Marker	366–374	Minimum Altitudes for Former Periglacial Landforms Adjacent to Longitude 106°W in Colorado and New Mexico, U.S.A., between Latitudes 33°N and 40°N
Tatjana Yu. Smirnova and Andrej A. Nikonov	375–388	A Revised Lichenometric Method and Its Application: Dating Great Past Earthquakes
Eric Steen Hansen and Peter Robert Dawes	389–400	Geological and Sociological Aspects of Epilithic Lichen Ecology at Qaanaaq (Thule), Northwestern Greenland
William L. Boyd, David R. Onn, and Josephine W. Boyd	401–411	Thermophilic Bacteria among Arctic, Subarctic, and Alpine Habitats
R. J. Williams	412–422	Growth of Subalpine Shrubs and Snowgrass Following a Rare Occurrence of Frost and Drought in Southeastern Australia
Book Reviews	423–425	*Winter: An Ecological Handbook:* J. C. Halfpenny and R. D. Ozanne. *Alpine Wildflowers of the Rocky Mountains:* J. W. Duft and R. K. Mosley. *Field Guide to Mosses of Boreal North America:* C. B. McQueen. Book Notices
Meetings	426	
Contents and Index for Volume 22, 1990	427–432	

SUBJECT AND AUTHOR INDEX FOR VOLUME 22, 1990

Ablation, 153–162
Acetylene reduction, 255–263
Acidification of alpine lakes, 264–274
Active layer, 175–182, 275–282
Alaska: Active layer thickness, 175–182; Microtine rodents, 51–64; Tundra vegetation, 275–282
Aleksandrova, Vera Danilovna: In Memoriam, 122–123
Alpine: Lakes, 264–274; Thermophilic bacteria, 401–411
Alps: Glacier mass-balance, 43–50; Grassland, 195–201; Permafrost distribution, 302–316; Pleistocene valley glaciers, 329–340
Antarctic: Vascular plants, 108–113
Arbaugh, M. J. *See* Peterson, D. L., et al.
Arctic: Ablation, 153–162; Energy balance of lake, 98–107; Energy balance of snowbank, 290–301; Lake regime, 163–174; Lichen ecology, 389–400; Lichen growth curve for Spitsbergen, 129–140; Temperature of blossoms, 282–289; Thermophilic bacteria, 401–411
Argentina: Dendroclimatology and glacier fluctuation, 215–232
Atmospheric icing, 90–97
Australia: Glaciation of Tasmania, 341–354; Subalpine plant growth, 412–422
Avalanche debris, 317–321

Bacteria: Soil, 401–411
Baker, W. L. and Veblen, T. E. (Spruce beetles and fires in the nineteenth-century subalpine forest of western Colorado, U.S.A.), 65–80
Baron, J. S. *See* McKnight, D. M., et al.
Batzli, G. O. and Henttonen, H. (Demography and resource use by microtine rodents near Toolik Lake, Alaska, U.S.A.), 51–64
Bell, I., Gardner, J., and Scally, F. de (An estimate of snow avalanche debris transport, Kaghan Valley, Himalaya, Pakistan), 317–321
Bello, R. and Smith, J. D. (The effect of weather variability

on the energy balance of a lake in the Hudson Bay Lowlands, Canada), 98–107
Benedict, J. B. (Experiments on lichen growth. I. Seasonal patterns and environmental controls), 244–254
Benedict, J. B. (Lichen mortality due to late-lying snow: Results of a transplant study), 81–89
Bigras, S. (Hydrological regime of lakes in the Mackenzie Delta, Northwest Territories, Canada), 163–174
Biogeomorphology: Subalpine river, 183–194
Blundon, D. J. and Dale, M. R. T. (Dinitrogen fixation [acetylene reduction] in primary succession near Mount Robson, British Columbia, Canada), 255–263
Book Reviews
Alpine Wildflowers of the Rocky Mountains. J. F. Duft and R. K. Mosley. *D. J. Cooper,* 424
Analytical Biogeography. A. A. Myers and P. S. Giller (eds.). *J. R. Spence,* 120–121
Data of Glaciological Studies (No. 40). G. A. Avsyuk (ed.). *J. T. Hollin,* 114
Dynamics of the West Antarctic Ice Sheet. C. J. van der Meer and J. Oerlemans (eds.). *J. T. Hollin,* 114
Field Guide to the Peat Mosses of Boreal North America. C. B. McQueen. *W. A. Weber,* 424
Glacier Fluctuations and Climate Change. J. Oerlemans (ed.). *T. Pfeffer,* 114–115
Greenhouse: Planning for Climate Change. G. I. Pearman. *V. Markgraf,* 205–206
Human Impact on Mountains. N. J. R. Allen (ed.). *C. A. Baied,* 119–120
Hydrology of Ice Caps in Volcanic Regions. H. Bjornsson. *S. C. Lundstrom,* 323
L'Eboulisation en Haute Montagne: Andes et Alpes. B. Francou. *F. L. Perez,* 115–116
Late Quaternary Sea-level Correlation and Applications. D. B. Scott et al. (eds.). *P. A. Hearty,* 204
Microbial Ecosystems of Antarctica. W. F. Vincent. *D. W. Freckman,* 203
Phytolith Analysis: An Archaeological and Geological Perspective. D. R. Piperno. *C. A. Baied,* 117–118
Polar Ecology. B. Stonehouse. *M. Walker,* 202
Proceedings of the Sixth Conference of the Comite Arctique International. L. Rey and V. Alexander (eds.). *R. Horner,* 202–203
Radiocarbon Dating: An Archaeological Perspective. R. E. Taylor. *D. Morrison,* 116–117
The Arctic (World Bibliographical Series No. 99). H. G. R. King. *M. Andrews,* 204–205
The Frozen Earth: Fundamentals of Geocryology. P. J. Williams and M. W. Smith. *F. E. Nelson,* 323–324
The Muskoxen of Polar Bear Pass. D. R. Gray. *P. Groves,* 118–119
Winter: An Ecological Handbook. J. C. Halfpenny. *A. Stamm and P. Weber,* 423–424
Botany: Temperature of blossoms, 282–289
Boyd, J. W. *See* Boyd, W. L., et al.
Boyd, W. L., Onn, D. R., and Boyd, J. W. (Thermophilic bacteria among arctic, subarctic, and alpine habitats), 401–411
Bradbury, J. P. *See* McKnight, D. M., et al.
Butler, D. R. *See* Malanson, G. A. and Butler, D. R.

Calcites, 141–152
Carbon gas flux, 275–282
Chinn, T. J. H. *See* Hicks, D. M., et al.
Climate: Unusual events, 412–422
Climatic variability, 233–243
Colobanthus quitensis, 108–113
Colorado: Alpine lakes, 264–274; Glacial geology, 14–25; Lichen growth, 244–254; Lichen snowkill, 81–89; Periglacial landforms, 366–374; Subalpine forest disturbance, 65–80

Dale, M. R. T. *See* Blundon, D. J. and Dale, M. R. T.
Dawes, P. R. *See* Hansen, E. S. and Dawes, P. R.
Demography of microtine rodents, 51–64
Dendrochronology: Argentina, 215–232
Dendroecology: Colorado subalpine forests, 65–80; Sierra Nevada, 233–243
Derderian, B. R. *See* Peterson, D. L., et al.
Deschampsia antarctica, 108–113
Diamicton, 14–25
Dikau, R. *See* Tatenhove, F. van and Dikau, R.
Disturbance: Natural in forests, 65–80
Doolittle, J. A., Hardisky, M. A., and Gross, M. F. (A ground-penetrating radar study of active layer thickness in areas of moist sedge and wet sedge tundra near Bethel, Alaska, U.S.A.), 175–182
Doolittle, J. A. *See also* Gross, M. F., et al.
Drought, 412–422

Earthquakes: Dating by lichenometry, 375–388
Ecology: Antarctic plants, 108–113; Forest disturbance, 65–80; Growth trends in pine, 233–243; Lichen, 389–400; Lichen mortality, 81–89; Microtine rodents, 51–64; Plant and soil groups in French Alps, 195–201; Subalpine plant growth, 412–422
Energy balance: Ice and snow, 153–162; Lake, 98–107; Snowbank, 290–301
Epilithic lichens, 389–400
Evaporation from lakes, 98–107

Fierens, G. *See* Sharp, M., et al.
Fire in forest, 65–80
French Alps: Plant and soil groups, 195–201

Gardner, J. *See* Bell, I., et al.
Gelder, G. van, Graaf, L. W. S. de, and Schurink, E. (Subglacial consolidation of fine-grained stratified sediments: a neglected tool in reconstruction ice-thickness in Pleistocene valley glaciers), 329–340
Gensac, P. (Plant and soil groups in the alpine grasslands of the Vanoise Massif, French Alps), 195–201
Geochemistry: Subglacial calcites, 141–152
Geomorphology: Alps, 329–340; End moraine, 14–25; Periglacial landforms, 366–374; Snow avalanche, 317–321
Glacial geology: Diamictons, 14–25; Proglacial lake, 26–42; Subglacial sediment, 329–340
Glacial hydrology, 141–152
Glaciation: Tasmania, 341–354
Glacier fluctuations: Argentina, 215–232
Glacier mass-balance, 43–50
Glaciers: Alps, 302–316
Gravel bars, 183–194
Greenland: Epilithic lichen ecology, 389–400
Gross, M. F., Hardisky, M. A., Doolittle, J. A., and Klemas, V. (Relationships among depth to frozen soil, soil wetness, and vegetation type and biomass in tundra near Bethel, Alaska, U.S.A.), 275–282
Gross, M. F. *See* Doolittle, J. A., et al.

Ground-penetrating radar, 175–182, 275–282
Growth trends, 233–243

Habitat use by microtine rodents, 51–64
Hansen, E. S. and Dawes, P. R. (Geological and sociological aspects of epilithic lichen ecology at Qaanaaq (Thule), northwest Greenland), 389–400
Hardisky, M. A. *See* Doolittle, J. A., et al.
Hardisky, M. A. *See also* Gross, M. F., et al.
Henttonen, H. *See* Batzli, G. O. and Henttonen, H.
Hicks, D. M., McSaveney, M. J., and Chinn, T. J. H. (Sedimentation in proglacial Ivory Lake, Southern Alps, New Zealand), 26–42
Himalaya: Snow avalanche, 317–321
Historical study of forest disturbance, 65–80
Holocene: Dating, 129–140; Moraines, 355–365
Hudson Bay Lowland, 98–107
Hydrology: Arctic lake regime, 163–174; Glacial basal water film, 141–152; Snowbank, 290–301

Ice thickness: Valley glaciers, 329–340
Ice: Melt energy, 153–162; Rime, 90–97
In Memoriam: Brian Sagar, 1927–1990, 322; John Winton Marr, 1914–1989, 207–208; Vera Danilovna Aleksandrova, 1910–1989, 122–123
Insect damage in forests, 65–80

Johnson, M. E. (Fabric and origin of diamictons in end moraines, Animas River valley, Colorado, U.S.A.), 14–25

Kevan, P. G. (Sexual differences in temperatures of blossoms on a dioecious plant, *Salix arctica:* significance for life in the Arctic), 283–289
Kiernan, K. (The extent of late Cenozoic glaciations in the Central Highlands of Tasmania, Australia), 341–354
Klemas, V. *See* Gross, M. F., et al.
Komárková, V., Poncet, S., and Poncet, J. (Additional and revisited localities of vascular plants *Deschampsia antarctica* Devs. and *Colobanthus quitensis* [Kunth] Bartl. in the Antarctic Peninsula area), 108–113

Lake: Energy balance, 98–107; Phytoplankton, 264–274; Regime, 163–174
Leiva, J. C. *See* Villalba, R., et al.
Lenzano, L. *See* Villalba, R., et al.
Letreguilly, A. and Reynaud, L. (Space and time distribution of glacier mass-balance in the Northern Hemisphere), 43–50
Lewkowicz, A. G. *See* Young, K. L. and Lewkowicz, A. G.
Lichen: Ecology, 81–89, 389–400; Growth experiments, 244–254; Survival threshold beneath snow, 81–89
Lichen-covered rocks, 389–400
Lichenometry: Growth curve for Spitsbergen, 129–140; Influence of snow, 81–89; Lichen growth, 244–254; Revised technique, 375–388
Locke, W. W. (Late Pleistocene glaciers and climate of western Montana, U.S.A.), 1–13
Loess deposition and erosion, 355–365

Mackenzie Delta, 163–174
Malanson, G. A. and Butler, D. R. (Woody debris, sediment, and riparian vegetation of a subalpine river, Montana, U.S.A.), 183–194
Mammalogy: Microtine rodents, 51–64
Marker, M. E. (Minimum altitudes for former periglacial landforms adjacent to longitude 106°W in Colorado and New Mexico between 33°N and 40°N), 366–374
Marr, John Winton: In Memoriam, 207–208
McKnight, D. M., Smith, R. L., Bradbury, J. P., Baron, J. S., and Spaulding, S. (Phytoplankton dynamics in three Rocky Mountain Lakes, Colorado, U.S.A.), 264–274
McSaveney, M. J. *See* Hicks, D. M., et al.
Meier, M. F. (Editorial), 213
Micrometeorological methods, 153–162
Micrometeorology: Snowbank, 290–301
Microtine rodents, 51–64
Montana: Pleistocene glaciers and climate, 1–13
Moraine: Nitrogen fixation, 255–263; Soil-age relationships, 355–365
Mountains: Atmospheric icing, 90–97
Munro, D. S. (Comparison of melt energy computations and ablatometer measurements on melting ice and snow), 153–162

Neoglacial glacier advances, 215–232
New England mountains: Atmospheric icing, 90–97
New Mexico: Periglacial landforms, 366–374
New Zealand: Proglacial lake sedimentation, 26–42; Soil-age relationships, 355–365
Nikonov, A. A. *See* Smirnova, T. Yu. and Nikonov, A. A.
Nitrogen fixation, 255–263
North America: Glacier mass-balance, 43–50

Onn, D. R. *See* Boyd, W. L., et al.

Pakistan: Snow avalanche, 317–321
Paleoclimate: Argentina, 215–232; Rocky Mountain, 1–13; Tasmania, 341–354
Paleoequilibrium line altitude, 1–13
Pamirs: Earthquakes, 375–388
Patagonia: Dendroclimatology and glacier fluctuations, 215–232
Periglacial landforms, 366–374
Permafrost: Distribution, 302–316; Mapping, 302–316
Peterson, D. L., Arbaugh, M. J., Robinson, L. J., and Derderian, B. R. (Growth trends of whitebark pine and lodgepole pine in a subalpine Sierra Nevada forest, California, U.S.A.), 233–243
Phytoplankton, 264–274
Plant communities: French Alps, 195–201; Moraine, 255–263
Plant growth, 412–422
Pleistocene: Paleoclimate, 1–13; Subglacial sediment, 329–340; Valley glaciers, 329–340
Poncet, J. *See* Komárková, V., et al.
Poncet, S. *See* Komárková, V., et al.
Primary succession, 255–263
Principal component analysis, 233–243
Proglacial lake, 26–42

Resource use by microtine rodents, 51–64
Reynaud, L. *See* Letreguilly, A. and Reynaud, L.
Rime, 90–97
Riparian vegetation, 183–194
River: Woody debris, 183–194
Robinson, L. J. *See* Peterson, D. L., et al.
Rock glacier, 302–316
Rocky Mountains: Phytoplankton in lakes, 264–274; Pleistocene glaciers and climate, 1–13
Rodbell, D. T. (Soil-age relationships on late Quaternary moraines, Arrowsmith Range, Southern Alps, New Zealand), 355–365

Rubullis, S. *See* Villalba, R., et al.
Ryerson, C. C. (Atmospheric icing rates with elevation on northern New England mountains, U.S.A.), 90–97

Sagar, Brian: In Memoriam, 322
Salix: Temperature of blossoms, 282–289
Scally, F. de. *See* Bell, I., et al.
Scandinavia: Glacier mass-balance, 43–50
Sediment: End moraine, 14–25; Gravel bars, 183–194; Proglacial lake, 26–42; Snow avalanche, 317–321; Subglacial consolidation, 329–340
Sharp, M., Tison, J.-L., and Fierens, G. (Geochemistry of subglacial calcites: implications for the hydrology of the basal water film), 141–152
Shrub-grass dynamics, 412–422
Smirnova, T. Yu. and Nikonov, A. A. (A revised lichenometric method and its application: dating great past earthquakes), 375–388
Smith, J. D. *See* Bello, J. and Smith, J. D.
Smith, R. L. *See* McKnight, D. M., et al.
Snow avalanche, 317–321
Snow: Ablation, 153–162; Energy balance, 290–301; Melt energy, 153–162
Snowbank fluctuations, 81–89
Soil: Development, 355–365; French Alps, 195–201; Wetness, 275–282
Southern hemisphere glaciation, 341–354
Spaulding, S. *See* McKnight, D. M., et al.
Spitsbergen: Lichen growth curve, 129–140
Spruce beetles, 65–80
Suarez, J. *See* Villalba, R., et al.
Subalpine: Natural disturbance in forest, 65–80; Nitrogen fixation, 255–263; Thermophilic bacteria, 401–411

Tatenhove, F. van and Dikau, R. (Past and present permafrost distribution in the Turtmanntal, Wallis, Swiss Alps), 302–316
Tien Shan: Earthquakes, 375–388; Glacier mass-balance, 43–50
Tison, J.-L. *See* Sharp, M., et al.
Tree: Growth trends, 233–243
Tundra: Active layer, 175–182, 275–282; Periglacial landforms, 366–374; Soil wetness, 275–282; Vegetation, 275–282; Voles, 51–64

USSR: Earthquakes, 375–388

Veblen, T. T. *See* Baker, W. L. and Veblen, T. T.
Villalba, R., Leiva, J. C., Rubullis, S., Suarez, J., and Lenzano, L. (Climate, tree-ring, and glacial fluctuations in the Río Frías Valley, Rio Nigro, Argentina), 215–232
Voles, 51–64

Weather variability: Hudson Bay Lowland, 98–107
Weathering rates, 355–365
Werner, A. (Lichen growth rates for the northwest coast of Spitsbergen, Svalbard), 129–140
Williams, R. J. (Growth of subalpine shrubs and snowgrass following a rare occurrence of frost and drought in southeastern Australia), 412–422
Wurm Glaciation, 329–340

Young, K. L. and Lewkowicz, A. G. (Surface energy balance of a perennial snowbank, Melville Island, Northwest Territories, Canada), 290–301
